

SES – Specialists in Mechanical & Electrical Services to the Construction Industry

ENVIRONMENTAL POLICY

The Company consists of offices located in Cardiff, supplying the following services to industry and commerce:

- Temporary Site Electrics
- Temporary Site Plumbing
- Permanent Electrical Installations

The Company is therefore committed to continual improvement of its environmental performance and to the prevention of pollution.

Within this framework the Company is committed in complying with relevant environmental legislation, regulations and where appropriate best practice guidance.

This is to be achieved by adopting the principles of environmental, health & safety and quality management systems.

The Company will communicate, liaise with and develop these systems in conjunction with employees, sub-contractors, customers, suppliers and other interested parties.

The key impacts on the Company's external environment have been identified as below and these will be central to the Company's improvement plan:

- Transport
- Use of recycled materials
- Waste discharges, emissions & disposal
- Accidents, incidents & emergencies

This policy will be regularly reviewed to ensure continual improvement of appropriate and relevant work processes and activities and to ensure identified areas have clear targets and objectives to achieve this goal.
